Teledentistry Consent

Family Health Center and the dental provider assigned to you today will use remote communication technology to conduct problem-focused evaluations/re-evaluations virtually, to help manage your oral health problem and to determine whether you have a condition that requires immediate in-office treatment.

As with any use of technology, there are potential risks and benefits associated with the use of electronic care services. Risks include, but may not be limited to, the following: technical failure, privacy and security breaches and delays or errors in appropriate oral evaluation and treatment due to the limitations of obtaining adequate information by telephone and an incomplete clinical and radiographic examination.

Benefits include reduced exposure to COVID-19 and other infectious diseases and increased convenience.

By giving your verbal consent to this teledentistry visit you agree that you understand and accept these risks and benefits.
